

Energy Efficiency for REScoops

Energy Efficiency : Status

Vision

The Negawatt scenario and many others are pointing to energy efficiency as a key aspect of the energy transition.

A synergic way to bring value to the members

Advocacy

An Energy Efficiency Directive as part of the Clean Energy package states the will of the commission to put “Energy Efficiency First”.

Activities

The Coalition of Energy Savings

The REScoop PLUS project

Energy Efficiency : Actions

The REScoop PLUS project has identified a set of best practices and a network of experts to enhance the deployment of energy efficiency measures in the REScoops

Expert REScoops

- EBO Consult (DK)
- Enercoop (FR)
- SEV (IT)
- Som Energia (ES)
- Ecopower (BE)

Energy Efficiency : Next Step

REScoop PLUS is offering the implementation of best practices in your organisations (expert support and training)

A new position paper is going to be published soon

Collecting the energy efficiency related tools in the REScoops and spread their use.

REScoop MECISE is implementing the EcoTrajet tool in order to support member in refurbishing their house.

Thank you for your attention

Join us during the Energy Efficiency
workshop
