

ODE pilot in the Netherlands

Active power control to provide secondary reserves

organisatie voor duurzame energie

ODE pilots with Tennet and FLEXCoop

Role: Balancing Service Provider - Respond to TenneT's request on balancing market (aFRR).

Tennet Pilot (NL natl project): Use wind turbines and solar park (RES curtailment)

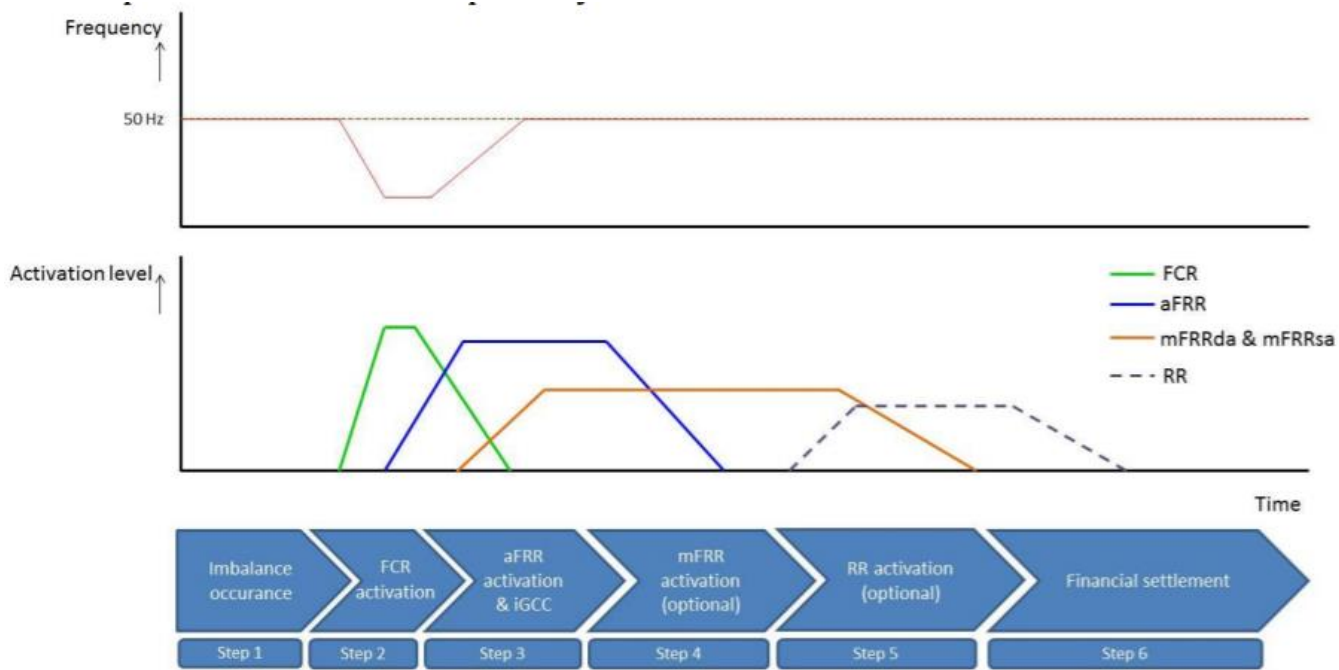

FLEXCoop Pilot (EU H2020 project): Use heat pumps and other domestic devices (demand response)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the grant agreement No 773909

ODE pilot with Tennet

ODE pilot with Tennet

Goal : a Co-op Aggregator/ VPP

Selling flex to the market

Enabling co-ops to sell their energy directly to their members (**+supplier**)

Set-up our own Open Source tools !!

OpenSource
Community

A quick overview of the
Demand Response working group...

Demand response WG

- **JUN-2017** REScoop.EU AGM in Girona – **ICT working group** meeting
Discussion on common ICT tools for co-ops (CRM, etc..)
- **OCT-2017** Kick-start of **FLEXCoop H2020** on DR for co-ops

Basecamp

#DemandResponse, #VPP, #EUproject

- Telcos and meetings: *experience and ideas*

Demand response WG/ FLEXCoop Living lab

Participants of our last physical meeting on 21 May-19

Thank you for your attention
